

You focus on running your business, we'll manage your Wi-Fi.

When you're hustling you don't have time for spotty connections, unruly employee bandwidth usage, or critical internet reliant tools going down. Meet Ooma Wi-Fi.

Full service. Simple set up. Complete control.

Ooma Wi-Fi is a plug and play solution built for small businesses. Configuration and control of your network is provided through a dedicated customer service team that does all the work for you – including monitoring it on-demand to ensure consistent connectivity.

Keep employee productivity up.

Employees are using your Wi-Fi for everything. Email, social media, streaming, the list goes on. Giving them easy access to exactly what they need means they can stay focused.

Professional network management and optimization.

Let Ooma's professionals manage your network, keeping employees, guests, POS devices and phones on separate networks to maximize Wi-Fi network performance and minimize conflict. Get assistance even when not on site.

24x7 customer support.

Whenever you need to know the status of your network or make changes to it, Ooma is always available.

Fast and easy deployment.

There's no need for specialized IT experience to deploy the access points. Simply plug them in and we'll do the rest remotely – including configuring and trouble-shooting.
